

# Harmony of the Spheres

Talk by Hartmut Warm

'The Signature of the Celestial Spheres'. As an exposition of a meaningful universe. The ground-work was laid by Johannes Kepler 500 years ago, and by Pythagorus and Plato almost two thousand years before. Hartmut discovered that the conjunctions of planets, points marked by particular planets at the time of conjunction between other planets, and even the orbital speed of different planets all interact with an intricacy far beyond 'chance' to fill the solar system with geometric and musically harmonic forms of great complexity and beauty.

The results of his work are represented with the aid of computer projections that provide a remarkable experience not only for astronomers but for anyone interested. Join us as Hartmut guides our understanding of the meaningful order in our solar-system. The cosmos breathes mysteriously in the structures which, like archetypes, are revealed. Ancient ideas of a 'harmony of the spheres' thus reappear in a new light.

Warm, Hartmut

Hartmut is an independent researcher in planetary astronomy and harmony of the spheres. He lectures in several European countries on his discoveries relating to the solar system and its inherent order. His book *Signature of the Celestial Spheres* was published by Rudolf Steiner Press in 2010. He lives in Hamburg, Germany and is travelling to England specially to give a few talks so don't miss this opportunity to hear an inspiring talk.

**Sunday 30th October 10am**

St Catherine's School House, 26A Portsmouth Road, Guildford, GU2 5DJ

Tickets on the door £10\*

*(\*we are sponsoring the travel & accommodation costs to bring Hartmut over from Germany for this very special talk)*

Free Parking space available in Lawn Rd or the council offices car park at the bottom of Lawn Road where there is a £1.50 charge on Sundays

Registered charity No. 313115
